### Question

One or more of your items currently have negative on-hand quantities or have been received without a bill.  
If you have sold any of these items in their current state, the actual cost of those sales is unknown.  
If required, adjustment entries will be recorded to correct the cost of those sales, but they will be recorded after the locked period as at the date you record the relevant bills or inventory adjustments.  
The adjustment entries cannot be dated within the locked period.

Do you want to continue?

Yes
