**Subject:** MYOB AccountRight | Upgrade required

## Update to the latest version of AccountRight

To ensure MYOB AccountRight is performing at its best, you'll need to upgrade AccountRight to the latest version, 2022.3 by **3 May 2022**. [Click here](#) to see what's new in the latest version.

As we release regular updates with improvements and fixes, older versions are decommissioned and will no longer work online. If you're using an older version and your file's online, you must update to the latest AccountRight version to keep working.

### AccountRight Server Edition update

If you use AccountRight in a network across one or more workstations, you can now access automatic updates. MYOB AccountRight 2022.3 Server Edition will automatically update across all workstations when a new version becomes available.

- **No more manual installations**  
With automatic updates, MYOB AccountRight will automatically check for updates and install the latest version – just like your PC Edition workstations.

- **Better user experience**

Your versions will stay synchronised via automatic updates on both Server Edition and PC Edition.

**Subject:** Automatic updates for AccountRight Server Edition

## Update your MYOB AccountRight automatically

Hi Tricia,

[MYOB AccountRight 2022.4](#) is coming next week, and with it, automatic updates - an exciting new feature if you're using AccountRight on a network.

Your MYOB AccountRight Server Edition will now automatically update when a new version becomes available. Once you've installed AccountRight 2022.4, you'll no longer need to manually update your network every time there's a new AccountRight release. So that's less hassle for you, and less downtime for your business.

- **No more manual installations**  
With automatic updates, MYOB AccountRight will automatically check for updates and install the latest version – just like your PC Edition workstations.
- **Better user experience**  
Your versions will stay synchronised via automatic updates on both Server Edition and PC Edition.

### Getting the update

You'll be able to access AccountRight 2022.4 via [my.myob](#) from 19 May 2022.\*

Before you upgrade, you'll need to complete a few steps to make sure AccountRight is set up correctly on your network. Once you've completed these steps, all AccountRight updates will be delivered to your network automatically.

**Important - Before you upgrade you must uninstall all previous versions of AccountRight Server Edition and API from all computers on your network.**

See our [support note](#) below for [step by step](#) instructions on how to install and enable automatic updates for AccountRight Server edition.
